

What is in this document?

PDR's vendor releases a major update to the PDR system every quarter. Releases include bug fixes, "behind the scenes" changes and updates to the user interface. This document highlights the major changes that will have an impact on PDR users.

A change made by the vendor has caused a disclaimer on our PDR form to become inaccurate.

The disclaimer shown at the bottom of the screenshot below instructs the user to "click the same button on the next screen in the lower left".

However, the vendor has moved this button over to the right on this screen. This may cause some minor confusion for the user. Please keep in mind that clicking this button is still required to advance the form to the next step.
